

County of Fairfax, Virginia

To protect and enrich the quality of life for the people, neighborhoods and diverse communities of Fairfax County

Electronic Docket Display Systems

The Fairfax County Courts utilize electronic docket displays throughout the courthouse. The docket displays show real-time case information identifying the case number, parties involved (unless sealed), courtroom and time.

The Fairfax County Circuit Court operates a custom case management system integrated with a third-party supported electronic docket display system, Infax *DocketCall*. *DocketCall* is a multi-featured application with integrated support for displaying information on multiple displays and integrated with a docket database providing real-time status of case information rendered evenly across a bank of docket displays.

The Fairfax County General District Court and Juvenile & Domestic Relations District Court have implemented an in-house docket display solution developed by the Supreme Court of Virginia (SCV). Both District Courts already utilize the State's Case Management System (CMS) which eliminates the dependency for a third party supported system. The SCV System is hosted in a Digital Media Manager (DMM) platform located in Richmond, VA and reads SCV CMS docket data through a web-based application. Digital Media Players (DMP) render the content on the docket displays from the web pages made available by the DMM.

Future efforts will focus on expanding the capabilities of the existing systems to include consolidated docket displays and other strategic locations in and around the courthouse.

The Electronic Docket Display System project meets the primary objectives to improve citizens' access to the Courts, facilitate trials and hearings in the most effective and efficient means possible, allow for all three Courts to share common resources, and provide for flexibility and adaptability to incorporate future changes in technology and court proceedings.
