

Appendix E – Goals, Objectives and Actions Reference List

Goals

- Goal A:** Reduce stormwater impacts to protect human health, safety and property.
- Goal B:** Protect and improve habitat and water quality to sustain native animals and plants.
- Goal C:** Provide for long term stewardship of the Middle Potomac Watersheds by building awareness of the importance of watershed protection and providing opportunities for enjoyment of streams.

Objectives

- Objective A1: Reduce stormwater volumes and velocities to minimize stream bank erosion.
- Objective A2: Reduce stormwater flooding and the potential damage from stormwater flooding.
- Objective A3: Reduce pollutants in stormwater runoff to protect human health.
- Objective B1: Reduce pollutants in stormwater runoff to protect fish and other aquatic life.
- Objective B2: Increase the use of LID for all development projects to reduce runoff and improve water quality.
- Objective B3: Restore and protect vegetated stream buffers to filter pollutants from runoff, to provide erosion control, and to provide habitat for animals.
- Objective B4: Protect and restore wetlands to provide habitat and improve water quality.
- Objective B5: Restore natural stream channels, banks and beds to provide improved habitat.
- Objective C1: Improve education and outreach.
- Objective C2: Improve watershed access and stewardship.
- Objective C3: Promote the implementation and maintenance of low impact development (LID) practices.

Table E.1 on the next page lists the actions in the Middle Potomac Watersheds along with the corresponding projects that relate to each action. They are arranged first by watershed, then by action, then by page number and project number. The two letter watershed codes for the projects are as follows:

Bull Neck Run – BN
Scotts Run - SC
Dead Run – DE
Turkey Run – TR
