DRIVEWAY PROFILE - LOT 21

DRIVEWAY PROFILE - LOT 23

Denotes Mill and Overlay
 Denotes Full Depth Pavement
 Denotes Demolition of Pavement
 T.B.R. To Be Removed
 T.B.R.L. To Be Relocated

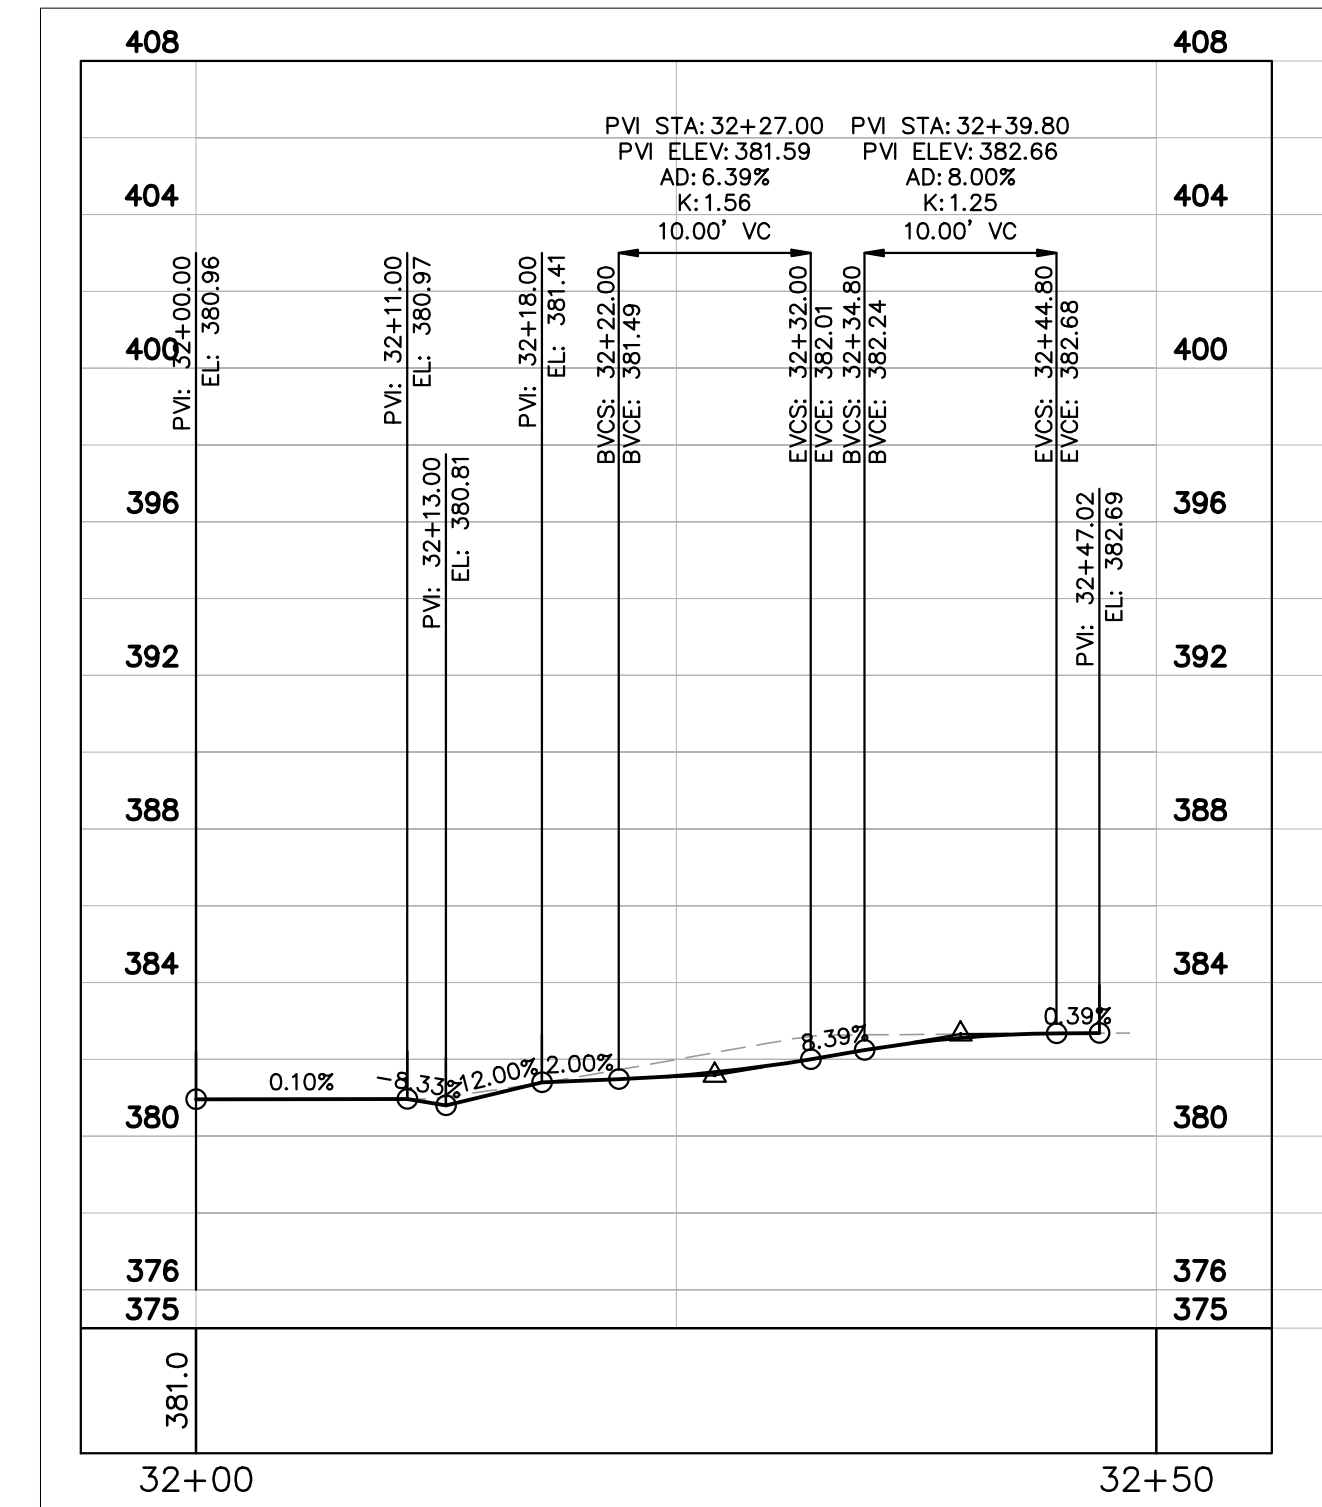

GRAPHIC SCALE IN FEET
 0 12.5 25 50

- Notes:**
- 1) Great Falls Street does not have a consistent crown. Cross slope ranges from approximately -6% to +5%. This project does not include correction of the Great Falls Street crown and as such calculations have not been performed for the existing drainage system.
 - 2) 11' lane is proposed to match existing.
 - 3) Drainage Quality and Quantity calculations have not been performed for this concept submittal.
 - 4) Additional survey is being obtained at entrances.
 - 5) Driveway profiles for lots 6(1), 6(2), 21, 32(2), and 36 have been shown with an 8% initial slope due to challenges presented by existing grade.
 - 6) Driveway profiles for lots 23 and 32(1) have been shown with the maximum 12% slope to allow traversable area to match the height of the sidewalk with a standard 6" curb.
 - 7) Sidewalk and retaining wall to be built at back of existing curb north of Hallwood Avenue.
 - 8) Retaining walls are flared at intersections to provide sufficient intersection sight distance.
 - 9) Existing intersection sight distance looking south from Hallwood Avenue is insufficient. Providing sufficient sight distance would require reconstruction of Great Falls Street.
 - 10) Full mill and overlay along the project may not be required. The pavement was recently overlaid.
